Master's thesis

**"Printer and plotter emulation in graphic mode" <http://rychoo.theunixplace.com/mgr/>**

supervisors: prof. dr hab. inż. Dariusz Badura & mgr Ireneusz Gościniak

Design of complete software emulating printer and plotter with their various control languages on the graphic screen, made with the first 32-bit Borland compiler for MS Windows in C++. The written part of the work includes a description of modern devices and a study of the object-oriented method of analyzing and interpreting the device language using its own drivers in text files.
